EXPERIENCE

Full Stack Software Engineer

Feb 2026 – Present

Cogneet

- Develop and maintain scalable full-stack applications spanning frontend (React/Next.js) and backend (Node.js/NestJS) systems in production.
- Collaborate with cross-functional product, design, and QA teams to ship production-ready features and optimize system performance.

Machine Learning Intern

Feb 2026 – Mar 2026

AlgoCure

- Developed core ML algorithms driving the company's proprietary models using transformer-based and classical feature extraction methods.

Operational & Technical Lead Intern

Aug 2025 – Jan 2026

Xcubit

- Led technical/operational workflows for a full-stack event platform (xcubit.in) built with Next.js 15, MongoDB, Redis, and Razorpay; handled 3,000+ registrations.
- Implemented a Redis-based read-through caching layer with graceful degradation, cutting database load and improving response times.

Freelance Software Developer

Sep 2023 – Present

Self-Employed

- Delivered 8+ production web apps across e-commerce, healthcare, events, education, and manufacturing, owning architecture, UI/UX, backend, payments, and deployment end-to-end.

RESEARCH

Detection of Depression From Video Data Patent Granted 2025

- Filed patent for a video-based depression detection pipeline using FaceNet.

Detection of Depression From Audio Data Conference Paper 2025

- Published at AICVMD-2025, Banaras Hindu University; combined classical and transformer-based (Wav2Vec2) methods.
