EXPERIENCE

Full Stack Software Engineer

Feb 2026 – Present

Cogneet

- Developing and maintaining scalable full-stack applications, handling both frontend and backend systems.
- Collaborating with cross-functional teams to deliver production-ready features and optimize system performance.

Machine Learning Intern

Feb 2026 – Mar 2026

AlgoCure

- Developing the core algorithms that will be driving the company's proprietary machine learning models.

Operational & Technical Lead Intern

Aug 2025 – Jan 2026

Xcubit

- Led technical and operational workflows for event platform development and deployment.
- Coordinated between development and business teams to ensure smooth execution of product features.

Software developer Intern

Dec 2024 – Feb 2025

Vief.in or VastavIntellect.com

Freelancer

Sep. 2023 – Present

Self-Employed

- Engage with businesses to enhance and manage their online presence through personalized websites
- Assess and troubleshoot server issues while supporting scalability and performance improvements.

President — Competitive Programming Club

Jan 2023 – Aug 2024

Echelon Institute of Technology

Faridabad, HR

- Founded the club for competitive programming in my college, which engages 10% - 20% students overall B.Tech Students.
- Hosted events that include 1 hackathon, 3 competitive quizzes, and 2 seminars.
- Worked and coordinated with my team to plan the execution of the events

Technical Lead — Google Developer Student Club

Jan 2023 – May 2024

Echelon Institute of Technology

Faridabad, HR

- Led a team of developers to organize and execute technical workshops, hackathons, and coding competitions, increasing the club participation by 10 - 12%.
- Designed and delivered hands-on sessions on emerging technologies, including web development, and cloud computing, benefiting over 150+ students.
- Worked with a teams to plan industrial visits for 80+ students.

RESEARCH

Detection of Depression From Video Data | Patent

Jun 2025

- Developed the code for detecting depression using FaceNet, applied on frames of video

Detection of Depression From Audio Data | Conference Paper

Jan 2025

- Published paper in AICVMD conference hosted by Banaras Hindu University
- Developed a machine learning model that leverages audio data for the detection of depression
- Implemented classical machine learning to advanced transformer-based methods for feature extraction

PROJECTS

- BikeBuddiesMore.com** | *Remix, NestJS, MongoDB, Mongoose, Shopify Admin API, JWT* Jan 2026 – Present
- Built a full-stack membership management platform for a biking community, featuring admin dashboards with server-side paginated user management, real-time search, and bulk email capabilities.
 - Developed a NestJS REST API with role-based access control (JWT + Guards), OTP-based email verification, and automated Shopify customer sync via GraphQL mutations.
 - Integrated Shopify Admin API for two-way member data sync, including metafield management, customer creation/updates, and CDN-based profile image uploads.
 - Implemented event management with RSVP tracking, feedback collection with image uploads, and a templated email system for bulk communications and membership renewals.
 - Designed a responsive admin dashboard with interactive stat cards, paginated data tables, and status/payment management workflows using Remix and Tailwind CSS.
- AAKAAR Medical** | *Next.js, Payload CMS, PostgreSQL, AWS S3, Docker* Mar 2026 – Present
- Built a full-stack CMS-powered website for Aakaar Medical using Payload CMS with a PostgreSQL database and S3 storage for media assets.
 - Designed a dynamic layout builder with reusable content blocks enabling non-technical staff to manage pages, posts, products, and research publications without code changes.
 - Integrated SEO plugin, search indexing, form builder, URL redirects, and nested document categories for enterprise-grade content management.
 - Implemented draft previews, live preview with SSR, scheduled publishing via a jobs queue, and on-demand ISR revalidation for instant content updates.
 - Containerized the application with Docker and deployed on a VPS; configured Brevo SMTP for transactional emails and role-based access control for the admin panel.
- Xcubit.in** | *Next.js, MongoDB, NextAuth, Redis, GSAP, Tailwind CSS, Mongoose* Aug 2025 – Dec 2025
- Developed a full-stack event hosting platform where users could browse and purchase tickets for various events.
 - Secured the freelance project after our hackathon submission won 2nd prize and impressed the judges.
 - Integrated secure authentication using NextAuth with MongoDB adapter and Razorpay for seamless payments.
 - Cache complex database queries using redis
 - Built a modern, responsive UI with Next.js and Tailwind CSS; handled backend operations using Mongoose.
- VastavIntellect.com** | *React, Node.js, Express, MongoDB, JWT, Tailwind CSS* Jan 2025 – Oct 2025
- Developed a production-grade full-stack web platform for a legal and intellectual property consultancy serving startups, enterprises, and institutions.
 - Built a modern React 19 frontend using Vite, Ant Design, and Tailwind CSS to deliver a responsive, enterprise-focused user experience.
 - Implemented secure authentication and authorization using JWT, bcrypt, and cookie-based session handling.
 - Designed RESTful APIs using Node.js and Express for service listings, content management, and client interactions.
 - Integrated rich text content management using TinyMCE, enabling dynamic editing of legal and service pages.
 - Implemented file upload and document handling workflows using Multer for legal and compliance-related assets.
 - Enabled structured data export and reporting features using Excel (xlsx) generation for business records.
 - Managed environment configuration and secrets using dotenv, ensuring secure production deployment.
- Sankalp** | *Next.js, MongoDB, NextAuth, Redux, Framer Motion, Socket.io, Express.js, Docker* Feb 2025 – May 2025
- Freelance project for Echelon Institute of Technology to manage all student club activities on a centralized platform.
 - Implemented club creation, member management, event hosting, attendance tracking, and auto-generated verifiable certificates using `html-to-image`.
 - Built modern, responsive UI with Framer Motion, Tailwind CSS, and rich text support using Quill editor.
 - Integrated real-time updates using Socket.io and managed global state with Redux Toolkit.
 - Developed a secure Express.js-based image upload server using Multer and Sharp; deployed services using Docker.
- Depression Detection** | *Next.js, MongoDB, Flask, Wav2Vec2, XGBoost, Tailwind CSS* Apr 2025
- Built a full-stack application to detect depression from voice samples using deep audio embeddings and ML models.

- Developed as a hackathon project hosted by Bennett University, inspired by our published research in AICVMD-2025 at BHU.
- Extracted audio features using **librosa** and **Wav2Vec2**, and classified emotional states using XGBoost with PCA-reduced features.
- Frontend built with Next.js and Tailwind CSS; Flask API served the ML model, MongoDB used for data storage.
- Focused on accessibility, anonymous use, and privacy-first architecture.

Echiesta | *React.js, Node.js, Express, Nodemailer, Axios, JQuery, Firebase, Git* Nov 2024 – Dec 2024

- Built and deployed a live web-based platform to manage event registrations, successfully handling over 3,000 registrations and 1,300+ attendees.
- Won the second prize, in hacksplash hackathon, using this project
- Ensured scalability and smooth user experience by optimizing the platform’s backend and frontend functionalities.

Smart Task Manager API | *Spring Boot, Java, MySQL, Spring Security, JWT, Hibernate* Jan 2024

- Developed a RESTful backend system for task management with user authentication and role-based access control.
- Implemented secure login and signup using Spring Security and JWT-based authentication.
- Designed and managed relational database schemas using MySQL and Hibernate (JPA) for efficient data handling.
- Built CRUD APIs for task creation, updates, deadlines, and status tracking with proper validation and error handling.
- Tested and documented APIs using Postman; followed clean architecture and modular service-layer design.

RecruitMe AI | *Node.js, React.js, Figma* Feb 2023

- Developed a hackathon project that provides tailored interview preparation questions based on individual skills, leveraging
- Designed UI/UX of the web page
- Integrated with job portals via API for automated resume ingestion

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Architect Associate, Oracle — Credential ID: 103007085OCI25CAA
Introduction to JAVA, Coding Ninjas — Credential ID: 3c8f96b9faa7f65f
Introduction to JAVA Excellence, Coding Ninjas — Credential ID: c12d594fd0c265d6
Python — NumPy, DataCamp — Focused on core numerical computing with NumPy
MTA – Introduction to Programming Using HTML and CSS, Microsoft
Data Structures, Coding Ninjas — Credential ID: 006fe6ab671e77c3
2nd Prize – HackSplash, Hackathon organized by Echelon Institute of Technology
Participant – CodeKhetra, Hackathon at JIMS Rohini
Participant – Hackaccino 3.0, Hackathon at Bennett University

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++, Java, SQL
Frameworks & Libraries: Next.js, React, Node.js, Flask, Express.js, Spring Boot, Tailwind CSS, Socket.io, Redux Toolkit, NextAuth, Framer Motion
Machine Learning: Wav2Vec, XGBoost, scikit-learn, pandas, NumPy, librosa, PCA
Tools & Platforms: Git, Docker, MongoDB, Mongoose, VS Code, Google Cloud, Postman
Other Tech: Razorpay API, Multer, JWT, REST APIs, OAuth

EDUCATION

Echelon Institute of Technology	Faridabad, HR
<i>Bachelor of Technology in Computer Science & Engineering</i>	<i>Oct. 2022 – May 2026</i>
